A DAY AMONG THE BOAT-YARDS -Great activity has prevailed in our boat-yards this season—no less than sixteen steamboats of different sizes having been built since the first of May last, besides numerous barges, wharf boats, &c. There are four yards in the seventeenth ward, three of which have been kept busy, and have turned off an amount of work proportionate to the capital invested. A great number of the boats thus built are for the lower trade; and this fact is at once compil-mentary to the skill of our mechanics, the deliver of our mechanics, the fidelity of our contractors and the local ad-

vantages of the place.

The first yard visited was that of Johnson & Martin, and is decidedly the largest in the city. Eight steamboats, a wharf-boat and

city. Eight steamboats, a wharf-boat and several barges have been built by them, some of the former bring of the largest class, and all amplaying the highest order of mechanical skill. They are as follows:

The Charmer, a large side-wheel boat, to run between Matches and New Orleans, and which reached its destination some time since. The Hope, Captain Moore, owner, for the Yasoo River; another, whose name we were unable to learn, built for Captain Butler, also for the lower trade; the Doubloon, Captain Harrison, also a lower river boat; the Priores, for Captain Pierce; the Thirty-Rith Parallel, a New Orleans and Arkaness River packet, a large, handsome and beautiful boat; another, whose name has not yet been decided upon, whose name has not yet been decided upon, has just been commenced; it is also designed for the Lower Mississippi; then last, but not least, is the magnificent steamer Magnetia, a Maysville packet, which will soon be completed, and promises to be one of the finest boats on the river. Nothing will be omitted which will in any way on hance either her beauty

or convenience. Another of the number we have mentionedthe Proress—a Cincinnati and Madison packet—deserves a particular notice. It is a middle-class, side-wheel boat, and has made a few trips, entirely to the satisfaction of the owners, and to those who have taken passage upon it. Everything about its machinery works like a charm, and the cabins are furnished in the most approved modern style. Captain David commands it.

Besides building, a great amount of repairing, repainting and resitting has been performed by the same men.

The next yard we encountered in our ramble was that of S. T. Hambleton & Co. This firm has built four new steamboats—two stern and two side-wheel—besides several smaller crafts. Like the others mentioned, they are chiefly for the lower rivers. Two of them, the Kate Mag and the Sièver Moon, are for Captain Boon; the former being destined for a local business on the Arkansas River, and the latter, not yet the Arkansas River, and the latter, not yet finished, will run between Memphis and the South.

The Ellen Groy, for Captain Johnson, is a small but excellent stern-wheel boat, and will be employed in a miscellaneous trade. The
Emerald, for Captain Williamson, is still on
the stocks, and when finished will run between
Cincinnati and New Cricans.

Everson & Co., a new firm, have built two

small boats—one a bowlder-boat, for Evans-ville, and another, the *Drummer*, a small storn-wheel, for Gilmore & Mitchell, and is now engaged on the Lower Mississippi. The same firm has another now in course of construction, not yet named, designed for a Kaskaskia. It is a small side-wheel boat.

is a small side-wheel boat.

But one small boat, a lower-river "trader," has been built at Litherman's yard. It was constructed by Robert Carnes.

Numerous boats, among which we noticed the Clipper, the Sectaerland, the Fred Tron, the Ohio Belle, the A. O. Tylor and the Guhare, are lying along the yards for repairs and reno vating, that they may be ready to avail themselves of the first permanent high water.

These yards give employment to a great number of hands—that of Johnson & Martin alone employing over ninety.

ATTEMPT TO BREAK JAIL .- Jailer Shookley was informed Saturday afternoon, by a pris-oner who occupies a cell on the ground floor, that an escape of the prisoners was contemplated, and that preparations were being made to that effect. On examination he found that they had dug out bricks from the wall sufficient for the largest man to crawl through. Under the floor a number of notched case-knives were found, which had been used to a considerable extent on the iron bars of the door. But for this timely discovery, the jail would doubtless have been cleared Saturday night.

THE PUBLIC SCHOOL LIBRARY.—This library, justly the pride of our city, has been thoroughly renovated and several thousand volumes added. This hour of his best representations, and drew, as we have already stated, an overflowing house. It was a finished piece of acting throughout. The "Amelia" of Miss Waite was very creditable to the young lady, who, by-the-by, is becoming quite a favorite with the habituse of this dramatic temple. To-night Mr. Anderson will personate "King Lear," in Shekspeare's tragedy of the same name. Those who have not yet seen Mr. A. In any of his strelling parts, will not have a better opportunity to judge of his excellent acting than is presented this evening.
